Subject: Senate Bills 39 and 40

Please add my endorsement to the positions presented by Ruffed Grouse Society biologist Eric Ellis on May 11. As a life long upland bird hunter (now in my sixties) and lover of the outdoors I truly appreciate the value that public land contributes to the enjoyment of these activities. I have read Mr. Ellis' written remarks to your committee and I couldn't be more supportive of his efforts on behalf of the Ruffed Grouse Society and sports men and women from our great state.

Our state has taken great strides in the area of forest management by working cooperatively with organizations such as the Ruffed Grouse Society and availing themselves of the talents that individuals within these organizations possess. I urge you to continue implementing the suggestions that these knowledgeable experts are able to provide.

Thank you.

Charles McCord
